

BRINGS NATURE IN

Colored Sheets

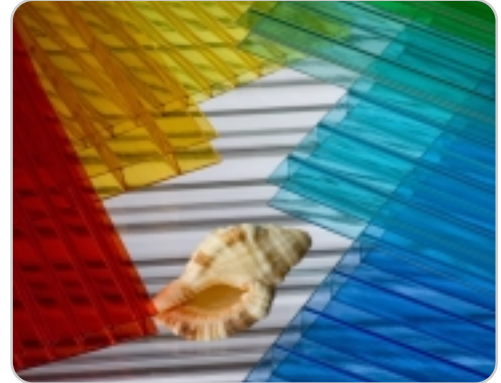

Colored Sheets

Nature is the creator of all colors and reflects the amazing joy and wonderment that it generates. Nature has taught us about all the different shades of red, how green conveys optimism and blue is infinite. When they say, add some color to your life, they are referring to the happiness, light and great feelings that accompany color. Polygal's colored sheets generate a unique atmosphere even in dull, grey areas. These Polygal sheets are available in a range of colors that allow you to incorporate them naturally into any environment or architecturally designed area.

These 8-25mm thick colored sheets by Polygal are flexible, heat-resistant, easy to install and can be used in a variety of applications.

The data in this advertisement is provided in good faith and constitute general information without commitment, and no warranty is given or implied. Polycarbonate is a combustible thermoplastic material that complies with various international standards, as customary in each country. Avoid exposure to excessive heat or aromatic cleaning solvents. Normal fire precautions should be taken to protect against combustion.
